# KIDware - Software for KIDS!
# For the Commodore 64/128
# *CSDI02 - Entertainment 3*

## Six programs with easy menu-driven operation:

**CHECKERS** - Play this classic game against the computer. The computer is not so smart that it can't be beat!

**REVERSE** - Called the best computer game ever! Trap the opponent's playing pieces and they reverse color. 1 or 2 players.

**ROW OF FIVE** - Try to be the first to line up five markers on a playing board. Play alone or with a friend.

**TIC-TAC-TOE** - Another classic! For two players or compete against the computer. You can beat the computer!

**TWISTER** - A flat version of the famous Rubik's cube. Twist a two-dimensional puzzle until it regains its original appearance.

**PEG JUMP** - Jump pegs on a playing board, removing each jumped peg. The goal is to leave as few pegs as possible.

## PROGRAM INFORMATION

Programs are for the Commodore 64 or Commodore 128 (in C64 mode). These programs require the computer console, a television (or monitor), and a VIC-1541 compatible disk drive.

To run the programs, turn on the disk drive, monitor, and C64/128, in that order. Put disk in drive 8, type LOAD "KID",8 Press <RETURN>. When computer responds with READY, type RUN and press <RETURN>. Disk will begin loading and a selection menu will appear. All operating instructions are provided by the programs.

## WARRANTY INFORMATION

We guarantee all programs will load and run. We do not guarantee suitability or content. If, within one year of purchase, a KIDware program fails to load or run, return the original disk to KIDware for replacement. This warranty only covers manufacturing defects. Except for the described replacement policy, the subsequent use of these programs is without warranty or liability. Also note that copying this disk, other than one backup copy for use by the original purchaser, is prohibited.

KIDware-15600 NE 8th, #B1-314-Bellevue, WA 98008

## DISK LOADING INFORMATION

Kidware disks use a "quick-loading" technique which considerably speeds up the VIC-1541 disk drive. Because of this, the disks may not load properly if you are using any other fast loading software (including fast load cartridges). You must disable such software when using KIDware disks.
